

WHEELS THAT WORK!

The WORX+ cup wheel range delivers exceptional performance hands down every time for every application.

TURBO RIM RANGE: FAST, AGGRESSIVE, SMOOTH!

- An awesome cupwheel range with smooth results for hard to very hard concrete.
- Slightly more aggressive cut and scratch pattern than the REFINE range 60/80 and 100/120 grit are great for removing stubborn scratches.
- Will "stay open" longer when grinding, particularly when not using any floor treatment agent to keep them open.
- Premium edge grinding due to continual diamond perimeter with minimal "rounding" of outer edge of the cupwheel segment.
- Available in 30/40, 60/80 & 100/120 grit in 125mm (5") and 180mm (7").

FORCE RANGE: HIGH PRODUCTIVITY

FORCE RIP

- A highly aggressive cup wheel range designed to deliver high productivity performance.
- Choose for rapid removal of concrete, glues and thin film coatings from concrete and masonry surfaces.
- Available in 125mm (5"), 150mm (6") (to suit Hilti) & 180mm (7") diameters. 6mm segment height. 30/40 Grit. Soft & Medium bond.

FORCE ARROW

- With widely spread segments, the ARROW delivers optimal performance for coating removal without wheel clogging.
- Choose for rapid removal of concrete, thick and thin film coatings from concrete and masonry surfaces.
- Available in 180mm (7") diameter. Soft bond.

FORCE PCD

- The Force PCD cup wheel makes removal of thick coatings fast and effective.
- Rip through coatings such as levelling compounds, mastics, epoxies and adhesives.
- Choose from two options: Fine smaller PCD pieces and coarse larger PCD pieces.
- Available in 125mm (5"), 150mm (6") (to suit Hilti) & 180mm (7") diameters.

ZIG ZAG: SURFACE PREP SUPREME

- The choice for rapid and aggressive surface preparation.
- Available in 125mm (5"), 150mm (6") (to suit Hilti) and 180mm (7") diameter. 16/20 grit, 30/40 grit soft bond.
- **Excellent for:**
 - o The removal of thick roll down coatings, glues etc. where an aggressive high speed tool is required.
 - o Medium to hard stock coating removal and the grinding/levelling of concrete.
 - o Removal of thick coatings such as levelling compounds, mastics, epoxies, adhesives.
 - o Grinding and levelling of concrete.

REFINE RANGE: THE ALL ROUNDER

- Specifically designed for general purpose and finishing applications. An excellent all round tool with impressive performance capacity.
- Multi segmented for smooth operation where surface refinement is essential.

- Available in 125mm (5"), 150mm (6") (to suit Hilti) & 180mm (7") diameters.

8mm segment height
30/40, 60/80, 120/140 grit
Soft & Medium bond
